THE SURVEY

Biomass Facility Closure Impact on Diversion Efforts

This survey is to determine whether biomass facility closure will adversely affect a jurisdiction's ability to achieve the 50% diversion goal, as required by AB 939. Please provide answers to the following questions for each jurisdiction. If there is any additional information that you wish to include, please feel free to do so.

Board Contact_____

_____
_____

3. Are the facilities that you use in danger of closing? If so, which ones are they and why will they close.

_____
_____
_____
_____
_____
_____

4. Please fill out the form below for each jurisdiction. Please provide the annual tons of each material processed by biomass facilities, and provide the percentage the tons contribute toward the 50% goal (estimates are ok).

Jurisdiction: _____

Material	Tons	% of Total Waste
Urban wood		
Forestry woodwaste		
Mill woodwaste		
Agricultural wastes		
Tires		
Livestock wastes		
Other (list type)		

5. Do you think that closure of biomass facilities will affect your ability to meet the 50% diversion requirement? If so, please briefly describe the extent that closure will affect your jurisdiction (please describe the effect as a percentage if possible).

_____

6. Do you have other markets for the materials currently sent to biomass? If yes, for which materials? (Confidential information need not be given; only state which materials will be sent to other markets.)

_____

7. If your jurisdiction does not have additional markets for the materials currently sent to biomass, will this material be landfilled? Or are other diversion programs expected to divert these materials?
